

CHACHA ATALLAH

CHARLOTTE

Technical sheet

Description

Charlotte is a bookshelf that fits any interior. Based on the concept of shelves, partitions and drawers, and depending on where you wish to integrate it, its dimensions will adapt to your space and your needs.

For example, you can add a mini bar with sliding doors, a place for your electronic devices, and even choose to light up the shelves to give more style to your interior.

The height of the shelves allows you to store large books, paperbacks, or even sculptures and other objects that are important to you and that you would like to display.
